

BUILT GREEN® High Density (HD) Process Flow Diagram

Registration & Certification

Builder supplies to Built Green Canada:

Enrolment Form & Certification Fees

Builder supplies to HD Verifier:

- Notice that project was enrolled
- HD Verifier's Fees
- Preliminary checklist (or workshop to jointly create checklist)

Training (optional)

 HD Verifier provides design charrette workshop(s) to help facilitate green design

Plan Review

Builder supplies to HD Verifier for review before construction:

- Preliminary project checklist
- Drawings

Pre-Design

- Hire an energy modeller
- HD Verifier may have active involvement with builder's design team

Construction

- Builder collects documentation for audit
- HD Verifier conducts pre-drywall inspection, as required
- HD Verifier conducts testing, as required

Corrective Action

 Builder will conduct, as required (reinspected by HD Verifier)

Construction Verification

- HD Verifier conducts final visual inspection
- Builder & HD Verifier sign final checklist

Certification Audit

- HD Verifier submits final verification documents to Built Green Canada for review
- Upon successful completion of audit review, project deemed certified

Auditing

 Built Green Canada performs 25% audit of implemented action items, more if unsuccessful (re-audit fees may apply)

Built Green Seal Awarded

- Built Green Canada awards glass plaque
- Additional requirements will be addressed on a case-bycase basis, with fees to be assessed
